RE: Underground Storage Tank Location Correction, 341 East Ohio Street Site,
Chicago, Illinois - STS Project No. 1-25585XG. Correspondence No. 020

Dear Mr. Ramsey:

This letter is a supplement to STS's October 8, 2001 letter report concerning the results of the RCRA hazardous waste characterization sampling at the 341 East Ohio Street site. We have noted some misinformation concerning the mapped location of the underground storage tanks removed from the then-Sandoz-Velsicol property, presented as part of STS's 1988 Environmental Reconnaissance study. In the Report for Environmental Reconnaissance, dated August 18, 1988, the underground storage tanks are mapped approximately 60 feet east of the northwest corner of the 330 East Grand building. These tanks, however, are referred to several times in the report as being located at the northwest corner of the 330 East Grand building. This northwest location is close to the permitted RCRA Hazardous Waste storage facility located inside the building. Please refer to Figure 1.

In a subsequent report issued on September 27, 1988, entitled Additional Field Exploration at the Sandoz-Velsicol Property, these same underground tanks are mapped in the northwest corner (see Figure 2). Upon review of the reports and discussion of the field activities conducted as part of these reports, we feel that Figure 2 shows what we interpret to be the correct location of the underground storage tanks.

Please contact us at 847 279 2500 with any comments or questions concerning this.

Sincerely,

STS CONSULTANTS, LTD.
